COCA WCB Update #413 October 1, 2008

Good News for Safety Training!

The Construction Safety Association of BC Board of Directors has decided to **reimburse** COR companies in **Sector 72** for **ALL Supervisors** who attend the CSABC Supervisor Training course up to the end of **2009!!!**

This is intended to encourage companies to send as many supervisors as possible for the two-day safety training course.

This is an excellent course that has been specially developed for the Construction Industry.

To register for a course, go to: www.csabc.ca and click on STAR COR.

When a company submits their COR application for 2008 or 2009 and they pass their audit, CSABC will reimburse for all supervisors who have attended training in the calendar year of their COR application. The company just needs to provide names of people who attended the training so that CSABC can verify them in our database.

(CSABC is a non-profit society. It was developed by and is affiliated with COCA.)
