COCA Update on WorkSafeBC Activities #484 August 9, 2010

### New Training Tools for Silica Dust and Mould

WorkSafeBC has posted two new videos on its website that will be very helpful to contractors.

The videos can either be used as part of a Toolbox talk if the site has web access or they can inform Supervisors about what to look for and how to prevent occupational disease related to these two hazards.

Both Silica dust and Mould can present serious health hazards to workers who are exposed to them.

Learn what to do to reduce or eliminate the risk of exposure.

The videos can be viewed at:
