COCA Update on WorkSafeBC Activities #475 May 25, 2010

Construction Industry Needs Your Expertise!

WorkSafeBC is out looking for Subject Matter Experts to assist with the consultation regarding their 2011 Occupational Health & Safety Regulation amendments.

People with knowledge and expertise in the following areas are required:

- Part 6 relating to asbestos;
- Part 9 relating to testing the atmosphere;
- Part 9 relating to low hazard atmospheres;
- Part 12 relating to driven-feed chippers;
- Part 15 relating to wire rope splices;
- Part 16 relating to securing elevated loads;
- Part 20 relating to the inclusion of CSA Standard Z151-09 – Concrete Pumps and Placing Booms in the regulations;
- Part 21 relating to seismic blasting; and
- Part 28 relating to rollover protective structures.

This is an excellent opportunity to help to shape reasonable and workable regulations that will protect our workers.

Where possible, WorkSafeBC will use conference calls to reduce the time commitment needed. Emails will also be used to streamline discussion.

If you are interested in volunteering as a Subject Matter Expert for one of the above areas, please contact Grant McMillan.

Please respond by May 28, Friday, if you are interested.
