COCA Update on WorkSafeBC Activities #504 March 7, 2011

New WorkSafeBC Safety Videos Available Online

Several new short construction safety videos are available on the WorkSafeBC website.

The video topics are: Mobile Equipment; Angle Grinders, Supervision in Construction and Underground Utilities. They vary in length from just over one minute to two and a half minutes. They are useful for introducing Tool Box safety talks and as a powerful visual memory aid.

The new videos can be viewed or downloaded online at:

<http://www2.worksafebc.com/Publications/Multimedia/Videos.asp?ReportID=36189>

These videos join existing construction safety videos that cover the topics of Power Tool Safety; Construction Zone Safety; Silica Exposure; Asbestos; Falls from Ladders and Drywall Handling. This group is available at:

<http://www2.worksafebc.com/Publications/Multimedia/Videos.asp?ReportID=35137>

When showing the videos and conducting safety talks, remember to record the names of those attending, ask them to initial or sign the attendance form and keep this as part of your proof of Due Diligence.
